

FAMILY ACHIEVEMENT CENTER

Answer these screening questions prior to each in-clinic therapy appointment.

If you answer “yes” to any question, your child should stay home.

Your child must not attend therapy if they:

- Test positive for COVID-19.
- Show symptoms of COVID-19.
- May have been exposed to COVID-19.
- Are waiting to get tested, or waiting for COVID-19 test results.

If your child has symptoms of COVID-19 or tests positive for COVID-19, they must stay at home in isolation and away from others as much as possible for 10 days (counting from the day their symptoms first started or the day they were tested), and until their symptoms get better and they have not had a fever for 24 hours (without taking medicine to lower the fever). Even if they feel better, they must stay home for the full 10 days. These steps help to keep others safe.

Note: Children may still need to stay home for other illnesses that have symptoms that are similar to COVID-19, such as strep throat, stomach illness, or pink eye.

0

1.)

Fever of 100.4 degrees Fahrenheit or higher

Difficulty or trouble breathing

If your child has one or more of these symptoms, they must stay home and should stay away from others as

much as possible, including family members.

2.)

Sore throat

Nausea

Vomiting

Diarrhea

Chills

Muscle pain

Excessive fatigue (extreme tiredness)

New or severe headache

New nasal congestion or runny nose

If your child has at least two of these symptoms, they must stay home and should stay away from others as much as possible, including family members. Consider calling your child's healthcare provider.

If no symptoms, go to the next question.

Yes: your child must stay at home in isolation and away from others as much as possible for 10 days (counting from the day their symptoms first started or the day they were tested), and until their symptoms get better and they have not had a fever for 24 hours (without taking medicine to lower the fever). Even if they feel better, they must stay home for the full 10 days. If your child has tested positive for COVID-19 but has no symptoms, they can return 10 days after the date of their test.

No: your child may attend therapy.

Yes: your child must stay at home in isolation and away from others as much as possible for 10 days (counting from the day their symptoms first started or the day they were tested), and until their symptoms get better and they have not had a fever for 24 hours (without taking medicine to lower the fever). Even if they feel better, they must stay home for the full 10 days. If your child has tested positive for COVID-19 but has no symptoms, they can return 10 days after the date of their test.

HOME SCREENING TOOL FOR COVID-19 SYMPTOMS

No: your child may attend therapy.

Yes: your child must not attend therapy. Your child can return 14 days after the last time they had close contact with someone with COVID-19, as long as your child has not developed symptoms or has tested positive for COVID-19. Close contact means being 6 feet or less for at least 15 minutes from a person who has COVID-19. Even if your child has tested negative, they cannot attend therapy until it has been 14 since they had close contact.

\ t @

No: your child may attend therapy.

Yes: your child must stay at home until they get their test results. Brothers, sisters, and other children living in the house must also stay at home until test results are known.

If the test result is negative, your child may attend therapy.

If the test result is positive, children remain at home and begin a 14 day quarantine period starting on the last day they has close contact with the positive case.
